

Driving the Next Startup Wave

Amazon Web Services supports the engineering-driven businesses of IEEE members!

Amazon Web Services (AWS) Worldwide Public Sector helps startup, government, education, and nonprofit customers deploy cloud services to reduce costs, drive efficiencies, and increase innovation across the globe. By using AWS's inexpensive and highly scalable infrastructure technology, startups around the world can stop paying for computing power they aren't using - and receive more mission for their money.

2019 International Conference of the IEEE Technology and Engineering Management Society Leading Innovation in Times of Constant Change

TEMSCON

Engineering managers are increasingly expected to lead innovation initiatives across their organization's value chain. Realizing benefits in constantly changing environments, whether through the adoption of new or improved technologies, business models, or processes, must be led proactively. The Technology and Engineering Management Society invites contributions from engineering managers and leaders, researchers, educators, innovators, entrepreneurs, and students to help advance understanding and the state of practice related to successful engineering management.

Calling all IEEE staff, members, volunteers, and so forth!
Do you have any pictures, photos, videos, media, related to IEEE, entrepreneurship, technology, or engineering?
Is there anything you haven't heard about related to IEEE Entrepreneurship that you wished was covered?
Is there anything you would like to hear more about?

If so, please share with l.beighley@ieee.org.

2019 | IEEE TEMS ISIE

The mission of the IEEE Technology and Engineering Management Society (TEMS) International Symposium on Innovation and Entrepreneurship (ISIE) is to help promote and advance knowledge in the field of innovation and entrepreneurship. Through encouraging discussions on current topics such as business model innovation, new technology directions and applications, managing globalization challenges, etc., ISIEs' aim is to enhance and improve essential management and leadership knowledge and skills, and foster active knowledge transfer between the academic and practicing communities. Contributions from researchers, educators, managers, and students are invited. They should document research activity, case studies or best practices, shedding light on the theory or practice of engineering, technology, innovation management, or entrepreneurship. Selected papers will have the opportunity to be published in a special issue of our flagship journal *IEEE Transactions on Engineering Management*, subject to our rigorous journal peer review process.

For more information, [click here](#).

On This Day...

IEEE pays tribute to the great civil engineer John Edgar Thomson who passed on this day in 1874. Thomson was responsible for organizing a network of railroads that increased efficiency in transportation from Philadelphia to as far west as Chicago and as south as Norfolk, VA, USA.

The Edison Storage Battery Company was founded on 27 May 1901. Edison wanted to increase the performance of the common lead cell battery, but his main reason behind founding the company was to conceive a feasible battery that could power an automobile. His great mind was one of those that founded the American Institute of Electrical Engineers (AIEE), which eventually merged with the Institute of Radio Engineers (IRE) to become IEEE.

Lastly, IEEE would like to honor the late Nobel Prize winner Ernst August Friedrich Ruska who died on 27 May 1988. Ernst split the Nobel Prize for Physics with Heinrich Rohrer and Gerd Binnig in 1986 for his invention, the electron microscope.

Upcoming Community Events

Events with a strong technology focus that overlap with IEEE's field of interest

TEMSCON | 2019

Atlanta, Georgia, USA

6 June 2019

2019 International Conference of the IEEE Technology and Engineering Management Society Leading Innovation in Times of Constant Change Engineering managers are increasingly expected to lead innovation initiatives across their organization's value chain. Realizing...

IEEE PES PowerTech Conference | 2019

Milano, Italy

23 June 2019

On behalf of the International Steering Committee and the Local Organizing Committee we invite you to attend the 13th IEEE PowerTech 2019 co-sponsored by IEEE Power & Energy Society (PES) and...

POWERAFRICA CONFERENCE | 2019

ABUJA, NIGERIA

KEN STAUFFER

20 August 2019

The IEEE Power and Energy Society (PES), Industrial Applications Society (IAS) and IEEE Nigeria Section are pleased to announce Call for Papers for the sixth IEEE PowerAfrica 2019 Conference with
