Driving the Next Startup Wave

Welcome to the IEEE Entrepreneurship Community!

You have the mind of an engineer and the heart of an entrepreneur. Where can you find others who share both your technical acumen along with your passion?

IEEE is focused on providing a voice and launching programs of interest to members of our community like you -- the people at the heart of the engineering and frontier tech startup ecosystem.

Why engineers are leading the next startup wave

We tend to think of the history of the IEEE as one of invention - the light bulb, telephone, telegraph, radio, oscillator and semiconductors were landmark inventions associated with our history. But the story of these inventions is also one of entrepreneurship. Their famous inventors were also startup founders.

Bell, Edison, Thomson and Hewlett had to launch their own startups to bring their innovations to the market and push past the status quo of the day.

The IEEE Entrepreneurship conversation is always going on!
